

Satellite Radio is an entertainment and information source that I pay for each month. The "benefit of the bargain" is that I can receive better programming with less interference from commercial advertising that has destroyed traditional radio's "listenability." No doubt millions of listeners will abandon traditional AM/FM radio and embrace Satellite Radio in the coming years. To accept NAB's petition 04-160 is to deny competition and stifle further innovation. If AM/FM is really that concerned they should modify their own programming to become a more competitive and attractive source of entertainment and information. I strongly and respectfully urge that the FCC reject NAB's petition 04-160
